Summary Prospectus

Global Bond Fund

TICKER: DODLX
ESTABLISHED: 2014

Before you invest, you may want to review the Fund's Prospectus and Statement of Additional Information, which contain more information about the Fund and its risks. You can find the Fund's Prospectus and Statement of Additional Information and other information about the Fund online at dodgeandcox.com/forms_literature.asp. You can also get this information at no cost by calling 800-621-3979 or by sending an email request to prospectus@dodgeandcox.com.

The Fund's Prospectus and Statement of Additional Information, dated May 1, 2018, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVES

The Fund seeks a high rate of total return consistent with long-term preservation of capital.

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. The table and example below do not reflect any transaction fees that may be charged by financial intermediaries or commissions that a shareholder may be required to pay directly to its financial intermediary when buying or selling shares.

SHAREHOLDER FEES (fees paid directly from your investment)

Sales charge (load) imposed on purchases	None
Deferred sales charge (load)	None
Sales charge (load) imposed on reinvested distributions	None
Redemption fee	None
Exchange fee	None

ANNUAL FUND OPERATING EXPENSES (expenses that you pay each year as a percentage of the value of your investment)

Management fees	0.50%
Distribution and/or service (12b-1) fees	None
Other expenses (transfer agent, custody, accounting, legal, etc.)	0.56%
Total Annual Fund Operating Expenses	1.06%
Expense Reimbursement	0.61%*
Net Expenses	0.45%*

* Dodge & Cox has contractually agreed to reimburse the Fund for all ordinary expenses to the extent necessary to maintain Total Annual Fund Operating expenses at 0.45% through April 30, 2019. The term of the agreement renews annually unless terminated with 30 days' written notice by either party prior to the end of the term.

Example: This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The example assumes that:

- You invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those time periods;
- Your investment has a 5% return each year; and
- The Fund's operating expenses remain the same but Dodge & Cox or the Fund terminates the expense reimbursement agreement as of April 30, 2019.

Transaction fees or commissions that may be charged by financial intermediaries on purchases and sales of shares of the Fund are not reflected in the example.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$46	\$276	\$525	\$1,239

PORTFOLIO TURNOVER

The Fund incurs transaction costs when Dodge & Cox buys and sells securities (or "turns over" the portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in annual Fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 46% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund invests in a diversified portfolio of bonds and other debt instruments of issuers from at least three different countries, which may include emerging market countries. The Fund is not required to allocate its investments in set percentages to particular countries and may invest in emerging markets without limit. Under normal circumstances, the Fund invests at least 40% of its total assets in securities of non-U.S. issuers and at least 80% of its total assets in debt instruments, which may, in each case, be represented by derivatives such as forward contracts, futures contracts, or swap agreements. Debt instruments in which the Fund may invest include, but are not limited to, government and government-related obligations, mortgage- and asset-backed securities, corporate and municipal bonds, and other fixed and floating rate instruments. The Fund invests in both U.S. dollar-denominated and non-U.S. dollar-denominated debt instruments.

The Fund invests primarily in investment-grade debt instruments (instruments rated Baa3 or higher by Moody's Investors Service ("Moody's"), BBB- or higher by Standard & Poor's Global Ratings ("S&P") or Fitch Ratings ("Fitch"), or equivalently rated by any nationally recognized statistical rating organization ("NRSRO"), or, if unrated, deemed to be of investment-grade quality by Dodge & Cox). Up to 20% of the Fund's total assets may be invested in debt securities rated below investment grade, commonly referred to as high-yield or "junk" bonds.

The Fund may buy or sell non-U.S. currencies and may enter into various currency or interest rate-related transactions involving derivative instruments, including forward contracts, futures contracts, and swap agreements. The Fund may use derivatives to seek to minimize the impact of losses to one or more of its investments (as a "hedging technique") or to implement its investment strategy. For example, the Fund may invest in derivative instruments that create exposure to a specific security or market sector as a substitute for a direct investment in the security or sector itself or to benefit from changes in the relative values of selected currencies. The Fund may use interest rate derivatives for a variety of purposes, including, but not limited to, managing the Fund's duration or adjusting the Fund's exposure to debt securities with different maturities.

In selecting securities, Dodge & Cox considers many factors, including, without limitation, yield, structure, covenants, credit quality, liquidity, call risk, duration, and capital appreciation potential. For all securities that are denominated in a foreign currency, Dodge & Cox analyzes whether to accept or hedge the

associated interest rate and currency risks. Dodge & Cox considers, among other things, a country's economic outlook and political stability, the protections provided to foreign investors, relative interest rates, exchange rates, a country's monetary and fiscal policies, its debt stock, and its ability to meet its funding needs.

The Fund may purchase or sell holdings for a variety of reasons such as to alter sector, geographic, or currency exposure or to shift the overall portfolio's risk profile. The proportions of the Fund's assets held in various debt instruments will be revised in light of Dodge & Cox's appraisal of the global economy, the relative yields of securities in the various market sectors and countries, the potential for a currency's appreciation, the investment prospects for issuers, the countries' domestic and political conditions, and other factors.

PRINCIPAL RISKS OF INVESTING

You could lose money by investing in the Fund, and the Fund could underperform other investments. You should expect the Fund's share price and total return to fluctuate within a wide range. The Fund's performance could be hurt by:

- **Manager risk.** Dodge & Cox's opinion about the intrinsic worth or creditworthiness of a company or security may be incorrect or the market may continue to undervalue the company or security. Dodge & Cox may not make timely purchases or sales of securities for the Fund.
- **Interest rate risk.** Debt security prices may decline due to rising interest rates. The price of debt securities with longer maturities is typically affected more by rising interest rates than the price of debt securities with shorter maturities.
- **Credit risk.** An issuer or guarantor of a debt security may be unable or unwilling to make scheduled payments of interest and principal. Actual or perceived deterioration in an issuer's or guarantor's financial condition may affect a security's value.
- **Below investment-grade securities risk.** Debt securities rated below investment grade, also known as high-yield or "junk" bonds generally have greater credit risk, more price volatility, and less liquidity than investment-grade securities.
- **Call risk.** If interest rates fall, issuers of callable bonds may repay securities with higher interest rates before maturity. This could cause the Fund to lose potential price appreciation and reinvest the proceeds in securities with lower interest rates or more credit risk.
- **Liquidity risk.** The Fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security. Liquidity risk may result from the lack of an active market or a reduced number and capacity of traditional market participants to make a market in fixed income securities and may be magnified under circumstances that cause increased supply in the market due to unusually high selling activity.
- **Mortgage- and asset-backed securities risk.** Mortgage- and certain asset-backed securities permit early repayment of principal based on prepayment of the underlying assets; changes in the rate of repayment affect the price and volatility of an investment. If prepayments occur more quickly than expected, the Fund receives lower interest payments than it expects. If prepayments

occur more slowly than expected, it delays the return of principal to the Fund. Securities issued by certain U.S. government-sponsored entities ("GSEs") are not issued or guaranteed by the U.S. Treasury; there is no assurance the U.S. government will provide support in the event a GSE issuer cannot meet its obligations.

- **Non-U.S. investment risk.** Securities of non-U.S. issuers may be less liquid, more volatile and harder to value than U.S. securities. Non-U.S. issuers may be subject to political, economic, or market instability, or unfavorable government action in their local jurisdictions or economic sanctions or other restrictions imposed by U.S. or foreign regulators. There may be less information publicly available about non-U.S. issuers and their securities and those issuers may be subject to lower levels of government regulation and oversight. Non-U.S. securities may decline in value due to conditions specific to an individual country, including unfavorable economic conditions relative to the United States. There may be increased risk of delayed transaction settlement. These risks may be higher when investing in emerging market issuers. Certain of these elevated risks may also apply to securities of U.S. issuers with significant non-U.S. operations.
- **Emerging markets risk.** Emerging market securities may present issuer, market, currency, liquidity, volatility, valuation, legal, political, and other risks different from, and potentially greater than, the risks of investing in securities of issuers in more developed markets.
- **Non-U.S. currency risk.** Non-U.S. currencies may decline relative to the U.S. dollar, which reduces the unhedged value of investments denominated in or otherwise exposed to those currencies. Dodge & Cox may not hedge or may not be successful in hedging the Fund's currency exposure. Dodge & Cox may not be able to determine accurately the extent to which a security or its issuer is exposed to currency risk.
- **Derivatives risk.** Investing with derivatives, such as currency forward contracts, interest rate swaps, and futures contracts involves risks additional to and possibly greater than those associated with investing directly in securities. The value of a derivative may not correlate to the value of the underlying instrument to the extent expected. Derivative transactions may be volatile, and can create leverage, which could cause the Fund to lose more than the amount of assets initially contributed to the transaction, if any. The Fund may not be able to close a derivatives position at an advantageous time or price. For over-the-counter derivatives transactions, the counterparty may be unable or unwilling to make required payments and deliveries, especially during times of financial market distress. Changes in regulation relating to a mutual fund's use of derivatives and related instruments may make derivatives more costly, limit the availability of derivatives, or otherwise adversely affect the value or performance of derivatives and the Fund.
- **Sovereign and government-related debt risk.** An issuer of sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due. In the event of a default by a governmental entity on a sovereign debt obligation, there may be few or no effective legal remedies for collecting on such debt.

An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PERFORMANCE INFORMATION

The following bar chart and table are intended to help you understand the risks of investing in the Fund. The bar chart shows changes in the Fund's returns from year to year. The table shows how the Fund's average annual total returns compare to those of a broad measure of market performance. The Fund has benefited since its inception from an expense reimbursement agreement. Without the expense reimbursement, Fund returns would have been lower.

Dodge & Cox Global Bond Fund, L.L.C., a private fund managed and funded by Dodge & Cox (the "Private Fund"), was reorganized into the Fund and the Fund commenced operations on May 1, 2014. The Private Fund was organized as Delaware limited liability company and was treated as a disregarded entity under the Internal Revenue Code of 1986, as amended (the "Code"). The Private Fund commenced operations on December 5, 2012, and had an investment objective, policies, and strategies that were, in all material respects, the same as those of the Fund, and was managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. However, the Private Fund was not registered as an investment company under the Investment Company Act of 1940 (the "1940 Act"), and therefore was not subject to certain investment limitations, diversification requirements, liquidity requirements, and other restrictions imposed by the 1940 Act and the Code, which, if applicable, may have adversely affected its performance. The Fund's performance for periods prior to the commencement of operations on May 1, 2014, is that of the Private Fund. The performance of the Private Fund has not been restated because the net total operating expense ratio of the Private Fund and the Fund (after the application of the expense reimbursement agreement) are the same. The 2012 and 2013 audited financial statements of the Private Fund are available from the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) database on the SEC's website (sec.gov), or by calling the Fund at 800-621-3979.

The Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future. Visit the Fund's website at dodgeandcox.com or call 800-621-3979 for current performance figures.

DODGE & COX GLOBAL BOND FUND

Annual Total Returns 2013-2017 (%)

Highest/Lowest quarterly results during the time period were:

Highest: 3.49% (quarter ended March 31, 2017)

Lowest: -4.16% (quarter ended September 30, 2015)

AVERAGE ANNUAL TOTAL RETURNS FOR THE PERIODS ENDED 12/31/2017

Dodge & Cox Global Bond Fund	1 Year	5 Years	Since Inception (12/5/2012)
Return before taxes	8.31%	2.86%	2.86%
Return after taxes on distributions	7.18	2.37	2.38
Return after taxes on distributions and sale of Fund shares	4.70	1.97	1.98
Bloomberg Barclays Global Aggregate Bond Index (reflects no deduction for expenses or taxes)	7.39	0.79	0.64

After-tax returns are calculated using the historical highest individual federal marginal income tax rates, but do not reflect the impact of state or local taxes. Actual after-tax returns may differ depending on your individual circumstances. After-tax return figures do not apply to you if you hold your Fund shares through a tax-deferred arrangement such as a 401(k) plan or an individual retirement account.

FUND MANAGEMENT

Dodge & Cox serves as investment manager to the Global Bond Fund. The Fund is managed by Dodge & Cox's Global Fixed Income Investment Committee ("GFIIC"), which consists of the following six members:

Committee Member	Primary Titles with Investment Manager	Years managing the Fund/ Years with Dodge & Cox
Dana M. Emery	Chief Executive Officer, President, Director, Director of Fixed Income, and member of U.S. Fixed Income Investment Committee ("USFIIC")	4/35
Thomas S. Dugan	Senior Vice President, Director, Associate Director of Fixed Income, and member of USFIIC	4/24
James H. Dignan	Vice President, Client Portfolio Manager, Research Analyst, and member of USFIIC	4/19
Adam S. Rubinson	Vice President, Client Portfolio Manager, Research Analyst, and member of USFIIC	4/16
Lucinda I. Johns	Vice President, Research Analyst, and member of USFIIC	4/16
Matthew B. Schefer	Vice President and Research Analyst	*/10

* Mr. Schefer was appointed to the GFIIC effective January 2018.

SUMMARY OF OTHER IMPORTANT INFORMATION ABOUT FUND SHARES

Purchase and Sale of Fund Shares

The minimum initial investment for shares of the Fund is \$2,500 (\$1,000 for Individual Retirement Accounts ("IRAs")) and the minimum subsequent investment is \$100. The Fund reserves the right to waive minimum investment amounts for certain financial intermediaries that use the Fund as part of an asset allocation program, certain retirement plans, and accounts that hold the Fund in omnibus name. Financial intermediaries may impose their own minimum investment amounts.

You may withdraw (redeem) any part of your account by selling shares. The sale price of your shares will be the Fund's next-determined net asset value after DST Asset Manager Solutions, Inc. ("DST Asset Manager Solutions") or an authorized agent or sub-agent receives all required documents in good order. You may sell shares as described below:

- Online: Visit the Dodge & Cox Funds' website at dodgeandcox.com, click on "Account Access" to log into your account and submit your request online.
- Mail: Visit Dodge & Cox Funds' website at dodgeandcox.com and click on "Forms & Guides." Download and complete the Redemption Request Form for a non-IRA and/or the IRA Distribution Request Form for an IRA. Mail the completed form(s) to "Dodge & Cox Funds, c/o DST Asset Manager Solutions, Inc., P.O. Box 8422, Boston, MA 02266-8422" to process your request(s).

- Phone: You may call Client Services at 800-621-3979 during business hours to place redemption or distribution requests for either a non-IRA or an IRA.

Tax Information

The Fund will distribute substantially all of its income and capital gains to its shareholders every year. You will be taxed on dividends you receive from the Fund as ordinary income and/or capital gains unless you hold your Fund shares in a tax-deferred retirement account, such as an IRA, or are otherwise tax exempt in which case you will generally be taxed only upon withdrawal of monies from the retirement account.

Payments to Financial Intermediaries

If you purchase the Fund through an employee benefit plan, Dodge & Cox may make payments to the recordkeeper, broker/dealer, bank, or other financial institution or organization (each a "Financial Intermediary") that provides shareholder record-keeping or other administrative services to the plan as compensation for those services. These payments may create a conflict of interest by influencing your Financial Intermediary to make available the Fund over other mutual funds or investments. You should ask your Financial Intermediary about differing and divergent interests and how it is compensated for administering your Fund investment.
